

CATEGORY	PRESENTING AUTHOR	POSTER TITLE	POSTER NUMBER
Cancer Clinical Trials - Progress and Outcomes	Yoland Antill	The impact of cause of mismatch repair deficiency and other molecular markers on clinical outcomes with the use of durvalumab in advanced endometrial cancer in phase 2 PHAEDRA trial (ANZGOG1601)	1
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	Preliminary results from a first-in-human trial of AMT-116, a topoisomerase I inhibitor containing antibody-drug conjugate (ADC), in patients with advanced solid tumours	2
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	MYE Symphony: A first-in-human study to investigate the safety, pharmacokinetics, pharmacodynamics and preliminary efficacy of the in vivo mRNA CAR therapy, MT-302, targeting TROP2 in adults with advanced epithelial tumours	3
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	Efficacy and safety of LM-108, an anti-CCR8 monoclonal antibody, in combination with an anti-PD-1 antibody in patients with gastric cancer: Results from phase 1/2 studies	4
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	A phase 1 / 2, first-in-human, open label, dose-escalation study of TAK-280, an investigational B7-H3 CD3ε conditional bispecific redirected activation (COBRA) T-cell engager, in adult patients with unresectable, locally advanced, or metastatic solid tumours	5
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	A Phase 1b study to evaluate HMBD-001 in combination with docetaxel with or without cetuximab in participants with advanced squamous non-small cell lung cancers, and HMBD-001 in combination with cetuximab in participants with advanced squamous cell cancers	6
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	Cross-over adjusted overall survival for amivantamab (AM) plus chemotherapy vs chemotherapy in first-line EGFR Exon-20 insertion NSCLC	7
Cancer Clinical Trials - Progress and Outcomes	Gary Richardson	Deciphering improved clinical therapeutic index (TI) of muzastotug (ADG126), a masked anti-CTLA-4 SAFEbody® over its unmasked form (ADG116) as monotherapy or in combination with anti-PD-1 therapy	8
Cancer - Exercise Therapy	Eva Zopf	Structured exercise improves fatigue and health-related quality of life in patients with metastatic breast cancer	9

Cardiology	Rose Crowley	Complications of catheter ablation for atrial fibrillation: important differences in patients with heart failure with systolic heart failure	10
Cardiology	Rose Crowley	Diagnosis to ablation time in persistent AF patients in the CAPLA trial: Any time can be a good time to ablate	11
Cardiology	Rose Crowley	Patterns of atrial fibrillation recurrence in patients undergoing catheter ablation for persistent AF: Implications for healthcare utilisation and quality of life	12
Cardiology	Rose Crowley	Persistent atrial fibrillation phenotypes and ablation outcomes: Persistent from outset vs progression from paroxysmal AF	13
Cardiology	Roopa Das	Incidence of post operative atrial fibrillation in patients post non-cardiac and non-thoracic surgery	14
Cardiology	Rachel Lim	Arterial switch operation for transposition of the great vessels – what about the coronary arteries?	15
Cardiology	Louise Segan	Relationship between Titin and lifestyle risk factors on incident AF risk among the UK Biobank	16
Cardiology	Louise Segan	Impact of catheter ablation on valvular remodelling in patients with AF with left ventricular systolic dysfunction	17
Cardiology	Louise Segan	WITHDRAWal of heart failure pharmacotherapy in patients with normalized left ventricular ejection fraction after AF rhythm control in AF-mediated cardiomyopathy – The WITHDRAW-AF randomised trial	18
Colorectal Cancer	Harrison Boka	Unravelling the side-dependent chemotherapy response of colorectal cancer using a patient-derived organoid model	19

Colorectal Cancer	Yajat Dua	Surgical crossroads: How chronic kidney disease alters colorectal cancer surgery outcomes	20
Colorectal Cancer	Christine Georges	Utilisation of the Cabrini Monash University Department of Surgery Tissue Microarray platform in collaborative research projects	21
Colorectal Cancer	Christine Georges	A comparison of surgery alone versus surgery plus adjuvant chemotherapy in stage III colon cancer: Utilisation of tissue microarrays to elucidate BRAF and dMMR status in understanding real-world patient cohorts and outcomes	22
Colorectal Cancer	Arthavan Surendran	The survival paradox – comparing prognostic outcomes in patients with late stage II and early stage III colorectal cancer	23
Colorectal Cancer	Simon Wilkins	A clinician-friendly dynamic nomogram to evaluate the obesity paradox in colorectal cancer survival outcomes	24
Colorectal Cancer	Simon Wilkins	Does BMI influence adverse postoperative outcomes following colorectal cancer surgery?	25
Gynaecology and Obstetrics	David Hennes	Rational engineering and design of 3D printed meshes with biofunctional assessment for pelvic reconstructive surgery: A pre-clinical assessment	26
Gynaecology and Obstetrics	David Hennes	Regenerative potential of human endometrial mesenchymal stem cells in sheep with simulated vaginal birth injury	27
Gynaecology and Obstetrics	Shayanti Mukherjee	Foreign body response to implanted human fascial lata in a mouse model: Implications for enhancing pelvic reconstructive surgery	28
Gynaecology and Obstetrics	Sascha Vereeck	Sacral colpopexy with fascia lata: a 1-year follow-up	29

Health Services	Karim Khalil and Ethan Erikson	Pre-hospital extracorporeal cardiopulmonary resuscitation: models of care and a narrative review	30
Health Services	Helen Kugler	Patient manual handling training. Are we wasting our time?	31
Health Services	Philip Russo	Australian healthcare workers' perspectives, practices, and perceived barriers to a more sustainable health system: a cross-sectional survey	32
Health Services	Ada Xie	Perioperative nursing shortages: An integrative review of their impact, causal factors, and mitigation strategies	33
Infection Control	Philip Russo	Investigating the effect of enhanced cleaning and disinfection of shared medical equipment on health-care-associated infections (CLEEN): a stepped-wedge, cluster randomised, controlled trial	34
Lung Cancer	Gary Richardson	Impact of receiving guideline concordant treatment on quality of life for people diagnosed with lung cancer: an Australian registry cohort study using patient-reported outcomes to drive value-based healthcare	35
Ovarian Cancer	Gary Richardson	Overall survival and patterns of care for women with rare ovarian cancers: A prospective study from the Australian National Gynaecology-Oncology Registry (NGOR)	36
Ovarian Cancer	Gary Richardson	Patterns of ovarian cancer care and overall survival in Australia: A prospective study from the National Gynaecology-Oncology Registry (NGOR)	37
Pharmacological Management	Seo Hyeon Jeong	Is the analgesic effect of tapentadol comparable to oxycodone post open heart surgery?	38
Pharmacological Management	Lexi Lim	Infusion reaction to anticancer therapy – is management optimised?	39

Pharmacological Management	Merlina Sulistio	Use of the Edmonton Classification System for cancer pain and the management of refractory cancer-induced bone pain	40
Prostate Cancer	Darren Lam	Use of PSMA PET/CT to assist patient selection for focal therapy	41
Prostate Cancer	Melissa Papargiris	<u>Melbourne Urological Research Alliance</u> : Turning patient tumours into tools for studying prostate cancer	42
Womens Mental Health	Eveline Mu	Bazedoxifene plus conjugated estrogen to treat menopausal depression – a pilot study	43
Womens Mental Health	Eveline Mu	Clozapine safety in pregnancy – A clinical study	44
