At Cabrini we believe in empowering our patients, their families and their healthcare team with choice.

We offer:

- The chance to choose a specialist based on your individual needs and preferences.
- The ability to avoid lengthy waitlists in the public hospital system.
- Access to the latest technology and treatments and a team of specialists with extensive experience.

Regardless of who you choose to lead your care at Cabrini, patients and general practitioners (GPs) can take comfort from knowing our specialists put their patient's needs and wishes first.

They are here to listen to patients, advise their medical team and use their expertise to guide you back to good health.

We believe our care should extend beyond the hospital into the community, so we are committed to supporting our patients' recovery and providing rehabilitation.

By choosing Cabrini for your care, you can be confident you will be cared for by an organisation with integrity. Everything we do is guided by our values: compassion, integrity, courage and respect.
