

Urology

Urological surgery is diagnosing and treating diseases involving the urinary system. Cabrini Brighton has a team of highly skilled, experienced urologists who provide a range of services for both adults and children. They are committed to ensuring patients are provided with the latest techniques and have access to the best technology and equipment, making sure your outcomes are of the highest standard.

Urology services provided at Cabrini Brighton include:

- Erectile dysfunction
- Kidney obstruction
- Prostate enlargement
- Urinary stones
- Urological cancers such as prostate, bladder and kidney
